

Newly ACGME Accredited Addiction Medicine Fellowship New Port Richey, Florida

Accepting applications for July 2025

BayCare Addiction Medicine Fellowship Program will welcome the first class of fellows on July 1, 2025. Accredited by the ACGME, it is a one-year fellowship designed for physicians who have completed a residency in their primary specialty and are seeking advanced training in the field of Addiction Medicine. Applicants must have completed an ACGME accredited medicine or psychiatry residency to be eligible.

Clinical training includes diverse rotations in both community-based outpatient and residential treatment settings, as well as hospital-based inpatient consultations. Core rotations and continuity clinics focus on patient-centered communication and integrate primary care with addiction medicine services. Primary rotations take place in New Port Richey.

A premier not-for-profit health system in the Tampa Bay area, BayCare includes 15 hospitals and numerous outpatient clinics. We believe in the train-to-retain service model and has many career opportunities available. We encourage our fellows to become part of the BayCare family and continue practicing in the Tampa Bay area after their training.

Jason B. Fields, MD

Program Director

Board Certified in Addiction Medicine, Dr. Fields specializes in Medication Assisted Treatment for Opioid Use Disorders and Alcohol Use Disorders. He received his Doctor of Medicine in Pediatrics from East Tennessee State University and completed his Addiction Medicine Fellowship at the University of Florida. Dr. Fields is passionate about teaching and research, and is the Current Treasure of the Florida Society of Addiction Medicine.
